

Lavina Arsyia Aryanto

Full-Stack Developer & AI/ML Enthusiast

Indonesia | +62 895 3405 25328 | arsyalavina@gmail.com | arsyalavina.dev | linkedin.com/in/arsyacoo | github.com/Arsyacoo

PROFESSIONAL SUMMARY

Informatics undergraduate and developer focused on building practical digital products using web technology, data, and artificial intelligence. Experienced in developing full-stack web applications, AI-assisted tools, dashboards, document intelligence systems, and machine learning prototypes using React, Next.js, FastAPI, Laravel, Python, and modern AI APIs. Strong interest in translating academic ideas into functional, documented, and deployable products.

EDUCATION

Bachelor of Informatics

Universitas Amikom Yogyakarta | 2023 - Present

- Relevant focus: software engineering, web development, artificial intelligence, machine learning, data analysis, database systems, and application development.

Software Engineering Student (RPL)

SMK Muhammadiyah 1 Yogyakarta | 2020 - 2023

- Studied programming fundamentals, web design, database management, and software development workflows.

PROJECT EXPERIENCE

PDF Insight AI - AI-Powered Document Analysis Platform

Full-Stack Developer | 2026

- Built a React and FastAPI application for PDF upload, summarization, quiz generation, flashcards, document comparison, and chat with PDF content.
- Implemented Retrieval-Augmented Generation workflows with Groq API to help users ask document questions and review generated responses with source context.
- Stack: React, FastAPI, Python, RAG, Groq API.

AI-Powered Healthcare Assistant

Frontend Developer | 2026

- Developed a React-based healthcare education prototype with symptom guidance, AI chat, medicine information, prevention tips, and medical disclaimers.
- Designed user-facing flows for general health education while clearly separating informational assistance from medical diagnosis.
- Stack: React, JavaScript, AI Chat, Healthcare UI.

Digital Transaction Fraud Detection

Machine Learning Developer | 2026

- Created a fraud transaction detection prototype using Random Forest with baseline comparison, PR-AUC evaluation, anomaly-score ablation, and Streamlit dashboard.
- Prepared model evaluation outputs to interpret potentially fraudulent transaction patterns and compare feature impact.
- Stack: Python, Jupyter Notebook, Scikit-learn, Pandas, Streamlit.

IDX Monitor - Indonesian Stock Monitoring Dashboard

Full-Stack Developer | 2026

- Built a FastAPI and React dashboard for monitoring Indonesian stock prices, visualizing market data, and observing potential whale activity.
- Stack: FastAPI, React, Python, JavaScript, Tailwind CSS.

Rental Iqra - Car Rental Reservation System

Full-Stack Developer | 2026

- Developed a Laravel and React reservation web application for vehicle rental workflows, booking-oriented interactions, and operational data handling.

WORK EXPERIENCE

Web Developer Intern

Universitas Jenderal Achmad Yani (UNJAYA) | 2021 - 2022

- Completed internship focused on web development and IT support tasks within a university environment.
- Supported practical software and technical workflows while strengthening fundamentals in web application development.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, PHP, HTML, CSS, SQL

Frontend: React, Next.js, Tailwind CSS, Bootstrap, responsive UI development

Backend & Database: FastAPI, Laravel, REST API, MySQL, PostgreSQL, MongoDB, SQL database design

AI/ML & Data: Scikit-learn, Pandas, NumPy, Random Forest, Streamlit, Jupyter Notebook, RAG, Groq API, Gemini API

Tools: Git, GitHub, VS Code, Google Cloud Skills Boost, Google Colab

ADDITIONAL ACTIVITIES

- Built end-to-end portfolio projects demonstrating practical implementation of full-stack development, AI integration, and data-driven application workflows.
- Practiced structured software development through problem analysis, implementation planning, iterative testing, project documentation, asset optimization, and public deployment preparation.
