

Lavina Arsyia Aryanto

Full-Stack Developer & AI/ML Enthusiast

Indonesia | +62 895 3405 25328 | arsyalavina@gmail.com | arsyalavina.dev | linkedin.com/in/arsyacoo | github.com/Arsyacoo

PROFESSIONAL SUMMARY

Informatics undergraduate and developer focused on building practical digital products using web technology, data, and artificial intelligence. Experienced in developing full-stack web applications, AI-assisted tools, dashboards, document intelligence systems, and machine learning prototypes using React, Next.js, FastAPI, Laravel, Python, and modern AI APIs. Comfortable working across frontend interfaces, backend APIs, data processing workflows, model evaluation, project documentation, and deployment preparation. Strong interest in translating academic ideas into functional, documented, and user-focused products.

EDUCATION

Bachelor of Informatics

Universitas Amikom Yogyakarta | 2023 - Present

- Relevant focus: software engineering, web development, artificial intelligence, machine learning, data analysis, database systems, algorithms, and application development.

Software Engineering Student (RPL)

SMK Muhammadiyah 1 Yogyakarta | 2020 - 2023

- Studied programming fundamentals, web design, database management, object-oriented programming, and software development workflows.

PROJECT EXPERIENCE

PDF Insight AI - AI-Powered Document Analysis Platform

Full-Stack Developer | 2026

- Built a React and FastAPI application for PDF upload, summarization, quiz generation, flashcards, document comparison, and chat with PDF content.
- Implemented Retrieval-Augmented Generation workflows with Groq API to support contextual document Q&A, generated responses, and source-aware learning assistance.
- Designed application flow for document-based study use cases including analysis, review, export-ready outputs, and interactive user feedback.
- Stack: React, FastAPI, Python, RAG, Groq API.

AI-Powered Healthcare Assistant

Frontend Developer | 2026

- Developed a React-based healthcare education prototype with symptom guidance, AI chat, medicine information, prevention tips, and medical disclaimers.
- Created user-facing flows for general health education while clearly separating informational assistance from medical diagnosis and emergency decision-making.
- Structured interface sections for symptom exploration, prevention education, medication information, and AI-assisted conversation experience.
- Stack: React, JavaScript, AI Chat, Healthcare UI.

Digital Transaction Fraud Detection

Machine Learning Developer | 2026

- Created a fraud transaction detection prototype using Random Forest with baseline comparison, PR-AUC evaluation, anomaly-score ablation, and Streamlit dashboard.
- Prepared model evaluation outputs to interpret potentially fraudulent transaction patterns, compare feature impact, and communicate prediction results clearly.
- Built dashboard-oriented presentation of model performance and fraud analysis workflow for easier review and experimentation.
- Stack: Python, Jupyter Notebook, Scikit-learn, Pandas, Streamlit.

IDX Monitor - Indonesian Stock Monitoring Dashboard

Full-Stack Developer | 2026

- Built a FastAPI and React dashboard for monitoring Indonesian stock prices, visualizing market data, and observing potential whale activity in real time.
- Implemented dashboard views for data display, financial observation workflows, and practical stock-monitoring interaction patterns.
- Stack: FastAPI, React, Python, JavaScript, Tailwind CSS.

Rental Iqra - Car Rental Reservation System

Full-Stack Developer | 2026

- Developed a Laravel and React reservation web application for vehicle rental workflows, booking-oriented interactions, and operational data handling.
- Worked on full-stack features for reservation flow, data management, frontend interaction, and backend-driven application behavior.

WORK EXPERIENCE

Web Developer Intern

Universitas Jenderal Achmad Yani (UNJAYA) | 2021 - 2022

- Completed internship focused on web development and IT support tasks within a university environment, supporting practical technical operations and software workflows.
- Assisted with web-related tasks, troubleshooting, content/data handling, and daily technical support while strengthening fundamentals in application development.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, PHP, HTML, CSS, SQL

Frontend: React, Next.js, Tailwind CSS, Bootstrap, responsive UI development, component-based interface design

Backend & Database: FastAPI, Laravel, REST API, MySQL, PostgreSQL, MongoDB, SQL database design, API integration

AI/ML & Data: Scikit-learn, Pandas, NumPy, Random Forest, Streamlit, Jupyter Notebook, RAG, Groq API, Gemini API, model evaluation

Tools & Workflow: Git, GitHub, VS Code, Google Cloud Skills Boost, Google Colab, documentation, testing, deployment preparation, asset optimization

ADDITIONAL ACTIVITIES

- Built end-to-end portfolio projects demonstrating practical implementation of full-stack development, AI integration, machine learning, and data-driven application workflows.
- Practiced structured software development through problem analysis, implementation planning, iterative testing, project documentation, UI refinement, asset optimization, and public deployment preparation.
